SIR C. E. M. DENTAL COLLEGE AND HOSPITAL, BOMBAY.

The number of students admitted to our Institutions for the B. D. S. Degree course of the Bombay University is on the increase so much so that admission of students for the year 1948–49 was restricted to only 11 instead of 20.

The following table shows in detail the number of students studying in different classes.

	Male.	Female.	Total.
1st year B. D. S.	10	—	10+(One left during II term).
2nd „ „	12	—	12
3rd „ „	18	3	21
4th „ „	13	1	14
	53	4	57

Also the following figures represent the admissions during the last three years :—

1946 14
1947 .. ..16 and 35 Lahore refugee students.
1948 11

The Institution was affiliated to the Bombay University in June 1945. 15 Lahore refugee students appeared for the final B. D. S. examination held in October 1948 and all of them passed out their examinations. Thus it will be seen that the result was cent percent.

This year the work in the Conservation, Prosthetic and Extraction Departments was carried out at full swing, because of increase in the number of students as well as the increase of patients attending the hospital. The students were carrying out all types of dental work.

The following table represents the various cases treated during the last three years.

Year	Extraction Local.	Ext. Genl.	Fillings & Scalings	X-Rays.	Partial & full dentures.	Orthodontics.	Daily Average.
1946	8,159	609	1,099	172	162	Nil	* (21.8)
1947	10,403	9,081	1,322	270	351	17	(26.2)
1948	10,943	9,204	1,739	680	313	19	(41.7)

* The amended figures of average are carried out after correct calculations.

Due to increased number of students and patients attending the hospital, the following additional staff was sanctioned and appointed.

1. One full time Professor in Dentistry and Dental Surgeon.
2. Three full time Demonstrators in Dentistry.

The Degree of B.D.S. has been recognised by the Royal College of Surgeons of England, London.

3rd year M.B.B.S. students attended the hospital to receive instructions in dental treatment as usual.

NOTE ON THE WORKING OF THE HAFFKINE INSTITUTE 1948.

A. *General.*—The year under review was witnessed by further expansion in the activities of the Institute. The carefully planned and re-equipped Departments of Vaccines, permitted the Institute to produce huge quantities and meet all the demands promptly. The Department of Pharmacology and Drug Testing has been completely equipped, but it has not been possible yet to get scientific personnel of adequate standing to permit the undertaking of testing and analysing of drugs for the various provinces and States. The Department of Chemotherapy made headways in large-scale production of Sulpha Drugs at low cost and undertook the mass production of vitamin tablets for distribution to " scarcity areas " of the Province. The Department of Clinical Pathology rendered very valuable work on the incidence of typhus fever in addition to the examination of over 20,000 samples. The Department of Entomology continued its researches on the Ecoloty of Indian rat-fleas and proved a Valuable training centre for the Sanitary Inspectors of the Province.

Government accepted the offer of Shri. M. A. Fazalbhoy to construct at his own cost a building in the compound of the J. J. Group of Hospitals to house the Child Welfare Clinic on certain terms and conditions. The building is to be constructed between the Out-patient Department of the J. J. Hospital and the B. J. Hospital for Children, Bombay.

The Executive Council of the Joint Centeuary Celebrations of the J. J. Hospital and the Grant Medical College, which were inaugurated by His Excellency the Governor of Bombay, on 13th March 1946, was not able to collect any further funds during the year under report and the total amount collected stood at Rs. 66,246 on 31st December 1949.

The T. B. Clinic at the Out-patient Department, J. J. Hospital, did good work during the year under report and was very popular. These Units are quite essential for the efficient teaching of the students as well as for proper attention to and treatment of patients and the question of continuing them on a permanent basis is being considered separately.

Government accepted a donation of Rs. 20,000 in 3 per cent Government Securities for the purchase of two Fowler's beds – one for the male ward and the other for the female ward, in the Parsee Ward at the J. J. Hospital, on the condition that each of the beds bear an inscription written in Gujarati as desired by the donor and the entire balance remaining thereafter is kept in tact and the interest accruing therefrom is utilised for the welfare of the poor, needy Parsee patients at the Hospital.

10. *The Homoeopathic Hospital, Bombay.*—The Government Homoeopathic Hospital, Bombay, was started on 5th May 1949, at the Karnatak House, Chira Bazar, Bombay, with the Honorary Chief Medical Officer and Honorary Physician in charge of it. Preliminary work has been carried out which consisted mainly of the purchase of equipment. At this work increased a full-time Resident Medical Officer (B. M. S. Class II) was appointed to assist him in equipping the hospital properly. At this juncture, it was reported by the Special Engineer, Bombay Municipality, that the front portion of the Karnatak House (the annexe) was not suitable for conversion into a hospital, as the existing height of the floors is below that required under the Municipal Regulations.

In the meantime a proposal was forwarded for the mutual exchange of the premises of the Homoeopathic Hospital at the Karnatak House and of the Karnatak Press at 103, East Sion. The site of the latter building was inspected by the Hon'ble Minister for Health, the Surgeon General and the Chief Executive Engineer of the locality at Sion, who reported that it was suitable for the purpose of the hospital. The proposal was accepted by Government and the Homoeopathic Hospital will occupy the building at Sion shortly.

MOFUSSIL HOSPITALS.

11. *Civil Hospital, Ahmedabad.*—Plans and estimates for the construction of a modern Hospital on an open and healthy site were submitted to Government. Construction of the Hospital has been started.

The wards of the hospital have been provided with electric fans and mosquito nets have been purchased for all the patients.

In the Gynaec Theatre, a modern operation table has been provided.

12. *Civil Hospital, Jalgaon.*—The Silver Jubilee Maternity Hospital attached to this hospital continued to be popular with the general public. Since the appointment of a lady doctor from May 1949 every possible advantage was taken by the female patients in the town as well as in the District. A Pathological Laboratory was opened and laboratory appliances and equipment were purchased to equip it properly. The sampling of drugs was not started till very late in the year. The Drugs Inspectors, soon after their appointment, were given the task of inspection of premises for which licences were granted without inspection during the initial stages. Such drugs were frozen and if the defect was such as could not be remedied the drugs were destroyed in the presence of the Drugs Controller or his representative.

Only one legal action was taken during the year 1949 against a well-known manufacturing concern which insisted on continuing the manufacture of its products without a licence. The Directors of the firm were convicted and fined Rs. 750.

After collecting the relevant statistics from the factories concerned and visiting the industrial areas in the State, the Special Officer submitted his report in the matter to Government. He suggested that, in view of the dearth of qualified medical men, who are prepared to take up full-time appointments and lack of accommodation for starting special dispensaries and hospitals for the insured workers the panel system should be adopted at least for some years, until Government were in a position to secure accommodation and medical practitioners willing to accept full-time appointments were forthcoming. This year the work in the Conservation, Prosthetic and Extraction Departments was carried out at full swing because of increase in the number of students as well as the increase of patients attending the hospital. All the above three departments were fully equipped with all the necessary instruments and materials. This year 21 new Modern Dental Chairs were purchased and installed in various departments and the students were carrying out all types of dental work.

The following table represents the various cases treated during the year 1949:—

Medical College, Baroda

This college started its classes on 11th June 1949 and was officially opened on 16th June 1949 by the Hon'ble Dr. M. D. D. Gilder, the Minister for Health. The total number of students admitted in the college is 40. The college is affiliated to the Bombay University for the 1st M. B. B. S. course.

Building & equipment.—The college will be a three storeyed building when completed. For the present it is temporar ly accommodated on the ground floor. It is expected to be completed by october 1950 and the departments of Anatomy and Physiology will shift up to the 2nd floor by November 1950. There is a cold storage plant installed for the Anatomy Department, but for want of a electric Mechanic the charge of the plant has not been taken over by the college. It is very essential that this plant should not be kept lying idle so long. A gas plant has also been received from Baird and Tatlock, but as long as it is not installed, the work will be carried on with spirit in the laboratories-an expensive procedure.

Most of the equipment had been ordered out from Baird and Tatlock, a firm in London, by the Ex. Baroda State Government. A good part of the contract has been executed. The college still lacks the necessary equipment to hold classes of 40 students at a time and a fair amount of equipment was not ordered out from England at all. It is gradually being obtained from various firms in the Indian Republic after obtaining quotations.

Teaching :—Teaching is imparted in two subjects, Anatomy and Physiology, for the 1st year.

Most of the students have by now dissected the two extremities and one major part.

(1) The Anatomy Museum to-day consists of 300 Anatomy and 22 Embryology Museum Specimens and about 103 models. It started from zero.

(2) The Embryology section is satisfactorily equipped inspite of the lecturer of Embryology not being appointed.

(3) From June 1949, 26 dead bodies were received, out of which 18 were injected for dissection and 8 were macerated.

Histology and Chemical Physiology went ahead of schedule because experimental Physiology was not equipped in the earlier stages. It has been fairly well equipped by now.

The type of teaching in Anatomy and Physiology has been of the Lecture-Demonstration type rather than the old system of full one hour lecture and separate demonstrations.

Library :—A grant of Rs. 8,000 a year has been sanctioned for the college for equipping the library from the initial stage. There are about 2,100 books and 27 medical journals subscribed to. There is a General Knowledge Section and students and the staff are issued books on loan from this section on a deposit of Rs. 5.

Common Room and the Canteen :—There is a Common Room and a Canteen for the recreation of students. They are supplied with : — (1) "The Times of India", "Free Press Journal", "The Illustrated Weekly" and "The Readers' Digest". (2) Indoor games, like Ping Pong, Carrum, etc. They can have light refreshments in the canteen at very moderate rates fixed by the Principal.

Hostels :—At present male students are accommodated in a Hostel situated on the first floor of a Government Building known as Bungalow No. 15 in the vicinity of the college. One lady student is accommodated in the Baroda Womens Hostel. The Hostel lacks a Superintendent as no bachelor Doctor was available.

Proposals are with Government for the erection of Hostel buildings for male as well as female students and it is expected that within a course of 3-5 years both the buildings will be ready. In the meanwhile it has been proposed to the Surgeon-General and to the Collector to acquire the whole of Bungalow No. 15 for Medical Students.

The Hostel is supplied with a first Aid Box. Two beds are reserved in the S. S. G. Hospital for Medical students.

Pharmacology :—A Professor of Pharmacology has already been appointed and he will be starting his course of Lectures-demonstrations in "Introduction to Pharmacology" from June 1950.

Many students have, either to shift from one charitable place to another or one friend's house to another.

THE HAFFKINE INSTITUTE BOMBAY

General.— During the year under review, the Institute continued to maintain its progress both in the field of research and manufacture of biological and chemotherapeutic products. After most of the scientific staff was recruited during the year, the Department of Pharmacology was able to register a further improvement in the testing of drugs and analysis of commercial samples of Pharmaceutical products. The Department of Chemotherapy evolved a new technique in the manufacture of Paludrine and also some sulpha drugs, but the manufacture and sale of the former had to be postponed till certain decisions are announced by the Government. The Nutrition Section of the Civil Supplies Department was amalgamated with the Nutrition Department of this Institute, and a separate office was formed with effect from the 1st September 1949. The other departments continued to maintain their high standard of efficiency.

Department of Vaccines:— During the year the following quantities of vaccines were issued.

Plague Vaccine	9, 091,499 ml.
Cholera Vaccine	6, 171,500 ml.
T. A. B. Vaccine	506,451 ml.

Department of Antitoxins and Sera.— During the year, 128 horses were employed for the preparation of antitoxins and sera. The total volume of toxins and toxoids manufactured for hyper-immunization of these horses amounted to 5,44,000 ml. The total volume of antitoxins and sera manufactured during the year amounted to 8,05,130 ml. The amount of anti-snake-venom serum lyophilised this year was 58,270 ml.

The following anti-toxins and sera were issued by the department for use in man.

3. *Department of Entomology* :—During the year, this Department was greatly handicapped, as, after the termination of the service of Dr. M. Sharif, the post of Assistant Director, which he held, had remained vacant throughout the year. However, with the help of the existing staff, all enquiries regarding rodents, fleas etc., were attended to and in addition two courses of training in Plague and anti-plague measures were conducted for the benefit of the Public Health Personnel of the Bombay Province. Besides these, 56,093 rats from the City of Bombay were examined during the year for detection of Plague.

4. *Department of Clinical Pathology* :—During the year free diagnostic facilities continued to be given in cases of many infectious diseases including Typhoid and Typhus Fever. During the year 795 blood samples were collected from suspected cases of enteric fever by the staff specially sanctioned by the Government and diagnosed. The number of blood samples received for Widal that test were 2,758 and for Wassermann and Kahn Test, it was 9,540. In addition to these the department prepared and supplied autovaccine as and when demanded and routine examinations for Rideal Walkar test were undertaken.

With the help of the staff specially sanctioned, the manufacture of the various diagnostic reagents was stimulated to a considerable extent. The increasing demand which was witnessed during the year showed the great popularity these products have come to enjoy.

5. *Department of Pharmacology* :—During the year a large number of scientific personnel was recruited. The Institute was fortunate enough to secure the services of a first class pharmacologist Dr. N. K. Dutta–as the head of the Department. Under his guidance and control, the activities of the Department have increased further and a large number of drugs were tested under the Drugs Act, 1940. The total number of samples received from the Drug Controller was 390. About 46 per cent. of these samples were found to be below standard, thus revealing that the quality of the medicinal preparation on the Indian Market was poor. Samples of Digitalis, Adrenaline, etc., mentioned in Schedule C and C1 of the Drugs Act of 1940 were also analysed in the department. In addition 537 lbs. of sulphanilamide vitaminised paste were prepared in the department and supplied to various hospitals. As the enforcement of the Drugs Act of 1940 proceeds further, this department is bound to expand further and play a very important role.

6. *Department of Biochemistry* : —During the year under report as in the previous year, this Department rendered very valuable aid to hospitals and practitioners by carrying out the various routine biochemical examinations needed for the proper diagnosis of diseases. Altogether 2,937 examinations were conducted, of which blood examinations were 1,704, urine 339, cerebrospinal fluid 625, body fluids 90 and the rest were miscellaneous.

Apart from this 203 milk samples were analysed.

7. *Department of Nutrition and experimental Pathology* : *Nutrition Section* :—This Department continued to render very useful service to the Civil Supplies Department and over 110 different samples of food–stuffs and other preparations were analysed in the department. Realising the great part nutrition has come to play in the public health of the Province, especially during the post–war days, the Government of Bombay have created a separate Nutrition Unit altogether amalgamating the Nutrition Section of the Civil Supplies Department with the Nutrition Department of this Institute. This unit has started functioning as a separate office altogether with effect from 1st September 1949.

Pathology Section :—During the year 932 pathological specimens were examined. In addition to this, 330 tissues of experimental animals were examined with a view to study morbid histological changes. These were mostly from the Experimental Pathology Section and from the other Research Inquiries conducted at this Institute.

8. *Department of Virs Diseases Including Rabies*:–The manufacture of 5 per cent. Sample's Vaccine for treatment of dog-bite cases continued to be its main manufacturing activity. Altogether 11,044 treatments were supplied including 675 for veterinary purposes. There are 120 Anti-rabic treatment centres depending on the institute for the supply of this vaccine. During the year 14,230 cc.s of rabies vaccine was supplied in bulk to centres which were not based on this institute for regular supplies. 5,413 persons attended for anti-rabic treatment at this institute itself.

The Yellow Fever Diagnostic Unit continued inoculations of passengers passing through Bombay with Yellow Fever Vaccine. 7,885 inoculations were carried out.

Blood Bank Department :— During the course of the year, the Government sanctioned the payment of Rs. 3 to every prisoner who volunteered to donate blood. As a result of this, the number of blood donors increased to 3442 and 459.500 litres of blood were processed and 5,10,000 litres of plasma dried. During the year, 330.250 litres of blood plasma was sold on payment and 89.500 litres were distributed free. The Medical Officer-in-charge of the Processing Unit–Doctor T. D. Patel–who has been evincing a very keen interest in this field of service, has of his own accord, gone abroad on study leave to acquint himself with the latest method and technique in the processing of blood. At the instance of the Honourable Minister for Health, preliminary work in connection with the setting up of a Serology Department, has been undertaken in close collaboration with the Chemical Adviser to the Government.

Department of Chemotherapy :— The year under review was one of intense activity. Extensive experiments were carried out with a view to evolve the most suitable method of manufacture of sulphamerazine. One process which is adaptable to our conditions and equipment on hand, has been arrived at, but the possibility of manufacturing it on a pilot plant scale is still being investigated. During the year, the manufacture of sulphathiazole on a moderately large scale was undertaken and the requirements of all Civil Hospitals and Dispensaries were met in full. The production records indicate, that during the period when regular batches were run, the production reached the largest level, though the plant was designed to half the capacity. The vitamin tablets section processed 4840 lb. of shark-liver oil and vitamin concentrates of average potency of 2,50,000 I. U. per gram were obtained. The following table gives the vitamin and sulphathiazole tablets produced during the year. :–

Kind of Tablets	*Production during 1949*
1. Vitamin A-D Tablets	*57,82,620**
2. Vitamin B-C Tablets	*57,91,010**
3. Vitamin B1 Tablets	*2,44,150*
4. Vitamin B2 Tablets	*69,290*
5. Vitamin C Tablets	*4,11,300*
6. Acid Nicotinic Tablets	*1,65,450*
7. Sulphathiazole Tablets	8,46,655

Besides these, 3500 ampoules of injectible sodium sulphathiazole solution were manufactured during the year.

* Out of these approximately 4 million of each were prepared for the Government for free distribution to the famine-stricken area.

General Remarks:— The statement of receipts and expenditure for the calendar year 1949 is attached herewith. Though the expenditure as shown therein has exceeded the receipts, it does not mean that the Institute has not been self-supporting. The financial year ended on 31st March 1950, and the final accounts as closed on that date reveal surplus receipt over expenditure. Two new residential chawls consisting of 96 three-room tenements were built, and a large No. of employees have been provided with quarters. Two more residential chawls administratively approved by the Government are still to be built, and when they are actually built and allotted, it is hoped that a majority of the members of the poorly paid staff will be accommodated.

CLASSES I AND II—There include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contribution from local funds or private subscriptions has not been regarded as a reason for not classing it as "State" when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—"Public" are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries whether maintained by State railways or others.

CLASS VII.—Comprises all subsidised dispensaries opened under the "Rural Medical Relief Scheme.
